Themes, Wallpapers, etc.. Disclaimer: We do not host any files on our servers. We only index and link to content provided by

other sites. DMCA PolicyThis website uses Javascript to provide a more mobile experience. We have no control over the content of these sites.A method of using a pad comprising materials that are liquid at room temperature is known. The pad that

is known from the prior art is suitable for absorbing body fluids and bodily waste. In order to change the pad, the pad is removed from the absorbent article and rinsed, and if necessary a new pad is placed in the absorbent article. This is a manual method that is not suitable for very large numbers of articles. A method of using a pad comprising materials that are liquid at room temperature that can be more easily changed is known. The pad that is known from the prior art is suitable for absorbing

body fluids and bodily waste. The pad is stored in a box containing several hundred pads, which are changed in a pre-programmed way at pre-arranged intervals. By measuring and electronically determining the quantity of the pads in the box, the consumption of the pads can be determined and any reduction in the consumption of the pads can be determined. This is a fully automatic method that is suitable for very large numbers of 82157476af
