
My name is Mary and I want to share my story about ShopKey 5. I was looking for a program that could help me with my shopping list, but I was not finding anything 'the way I like it'. So, I decided to make one myself. It took me only three hours to create my first version of ShopKey 5 which you can find out more about on my blog, <https://shopkey5frombeginning.wordpress.com> It was just a hobby for me because I had no idea that many people would adopt my solution, but now I know it works perfect for lots of people. More than 10 000 downloads now. If you want to try out this program you can download it here http://www.myarduino.com/?download=shopkey5_demo_setup_file I added ShopKey 5 to my Arduino projects page <https://arduino.projects.wordpress.com/page-shopkey5/> where you can find also other Arduino projects I made. If you are an Arduino beginner please check my post about making your first Arduino project <http://www.smashingelectronics.com/arduino-first-project/> ShopKey 5 is also available for iPhone and iPad. Just search for ShopKey 5 on AppStore. Twitter: <https://twitter.com/arduino.projects>
